

Technology Partner Solution Brief

Cisco + Tufin: More Secure Together

Simplifying Network Complexity

Tufin simplifies network complexity with an AI-powered control plane that delivers centralized visibility, automated policy orchestration, and continuous compliance across on-premises firewalls, cloud platforms, SASE, SD-WAN, and microsegmentation.

Tufin's network security policy management platform enhances the Cisco business value proposition by managing and unifying security policies across Cisco technologies, including Firepower hybrid mesh firewalls, ACI, Meraki, Catalyst SD-WAN as well as Cisco Routers and Switches.

Cisco Customer Benefits

For Firewall Administrators

Visualize and manage your network across on-premises firewalls, software-defined networks, cloud, and SASE. Ensure compliance, troubleshoot issues, and automate changes to keep your network secure.

For IT and Network Operations Teams

Control and orchestrate changes in your network from the application context down to the device. Build simple, automated workflows that assess risk, manage change, and optimize operations.

For InfoSec and Cybersecurity Teams

Protect and remediate security issues, threats, and breaches. Prioritize vulnerabilities and incidents within the context of the network, fix them immediately through coordinated automation, and integrate with SIEM and SOAR frameworks for real-time security.

RULE VIEWER						
TufinAI Assistant Rule Search						
1	AWS-IT				Last hit N/A	Last modified 922 days ago
	Source Destination	No comment			Permissiveness N/A	Cert. Exp 119 days ago
					Violations High	
1	GCP				Last hit Today	Last modified 199 days ago
	Source Destination	Please delete			Permissiveness High	Cert. Exp 243 days ago
					Violations Critical	
113	Prisma Access (PAN)				Last hit N/A	Last modified 161 days ago
	Source Destination	Allow traffic to corporate website			Permissiveness Low	Cert. Exp in 94 days
					Violations Medium	

Tufin Rule Viewer: Track every rule, change, and violation across your hybrid network.

What You Can Do with Tufin + Cisco

1

Gain Unified Visibility

See all **Cisco devices, traffic flows, and policies** in the context of your entire **hybrid, multi-vendor network** on-premises, SASE, and cloud, enabling faster troubleshooting and better decision-making.

2

Automate Policy Orchestration

Assess, simulate, and implement policy changes across Cisco environments with **built-in risk analysis, path simulation, and compliance validation**, reducing manual effort and errors.

3

Ensure Continuous Compliance

Track every **rule, change, and violation** across **Cisco Secure Firewall, ACI, SD-WAN, and Meraki** to maintain continuous audit readiness and alignment with security standards.

4

Streamline Change Workflows

Automate **Cisco policy changes** directly into ITSM tools like **ServiceNow** for policy-driven approvals, accelerating change cycles while maintaining governance.

5

Enforce Security Intent Consistently

Maintain consistent enforcement of **security intent and segmentation policies** across **Cisco SD-WAN**, including **Meraki** and **Catalyst**, ensuring unified posture and reduced risk.

Tufin Topology: Visualize Cisco devices in real time.

About Tufin

Tufin is the leader in network security policy management, helping enterprises manage and protect modern, multi-vendor networks that span data centers, cloud, and the edge. Tufin's platform provides a **unified control plane for the network**, centralizing visibility, automating policy orchestration, and enabling continuous compliance across today's fragmented and complex environments. Thousands of organizations worldwide rely on Tufin to deliver secure application connectivity, accelerate network changes, ensure audit readiness, and minimize risk exposure.
