

Network Change Automation.

How Much Can Your Business Save?

Existing manual approaches to network operations take days or weeks and result in errors and new security risks. Some of the largest organizations in the world enhanced their efficiency and accuracy with Tufin—all while using fewer resources. See how you can **improve your organization's security posture and bottom line** through automating access changes across even the most dynamic and fragmented networks.

Automation Boosts Business Agility.

A leading American insurance company

reduced the time to implement changes from **10-14 days to same day implementation**, improving customer satisfaction and eliminating delays impacting the business.

A large utility company in the U.S.

reduced the time to implement network changes by **87%, from 1-2 months to less than a week** — dramatically increasing client satisfaction with standardized delivery.

A large European telco

automated their network changes and **accelerated implementation** from **1-2 weeks to 1-2 days** — improving productivity by 20-30% right off the bat with the automated processing of duplicate requests.

Automation Increases Operational Efficiency and Productivity.

A large U.S. federal agency

automated 82% of their firewall changes and **freed up 67% of the team bandwidth** to focus on strategic projects, and are now implementing changes in **1 hour instead of over 5 business days**.

One of the largest car manufacturers in Germany

improved productivity by 50% and eliminated change escalations by using automation to implement changes in **less than 1 day**.

One of the leading healthcare providers in the U.S.

freed up to 62% of the team from working on ongoing change requests by using automation to implement changes in **1 day instead of 1-2 weeks**.

Automation Improves Security and Accuracy.

A leading credit card provider in the U.S.

reduced redo rates from **25% to less than 3%** by automating firewall changes.

A large financial services company in the U.S.

automated firewall cleanup and **decommissioned 18K redundant rules in 1 day** to tighten network security.

A large utility company in EMEA

used automation to enforce a consistent, fully documented process and was able to **cut down audit preparation to 1-2 days** and eliminate reopened requests altogether.
