Broadest set of automated business use-cases.

- ✓ Broadest support for different automated use cases (including enabling new access, re-certifying/decommissioning rules or servers, cloning servers and managing the change window)
- ✓ Simple graphical user interface to create and customize your change workflows without vendor support
- ✓ Broadest platform support for designing and implementing changes
- ✓ Full control on the level of automation (from semi-automated to zero touch) for all workflows

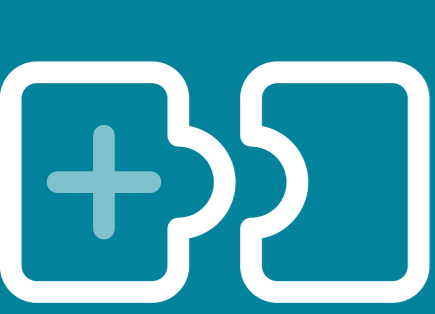

Broadest Next Generation Firewall Offering.

- ✓ Industry leading support for automating policy changes with NGFW capabilities (including next-gen Apps, Users, FQDN, Tags, Dynamic Objects, Security Profiles and more).
- ✓ Full visibility, change tracking, policy optimization and automation for leading Next-Generation Firewalls

Leading solution for network segmentation across hybrid enterprise.

- ✓ Visual representation of organization's segmentation policy
- ✓ Easily identify gaps between desired state of security and actual security configurations
- ✓ Simplified way to build and maintain the organization security policy
- ✓ Real time alerting mechanism
- ✓ Advanced exception management
- ✓ Out-of-the-box best practices policies and policy templates

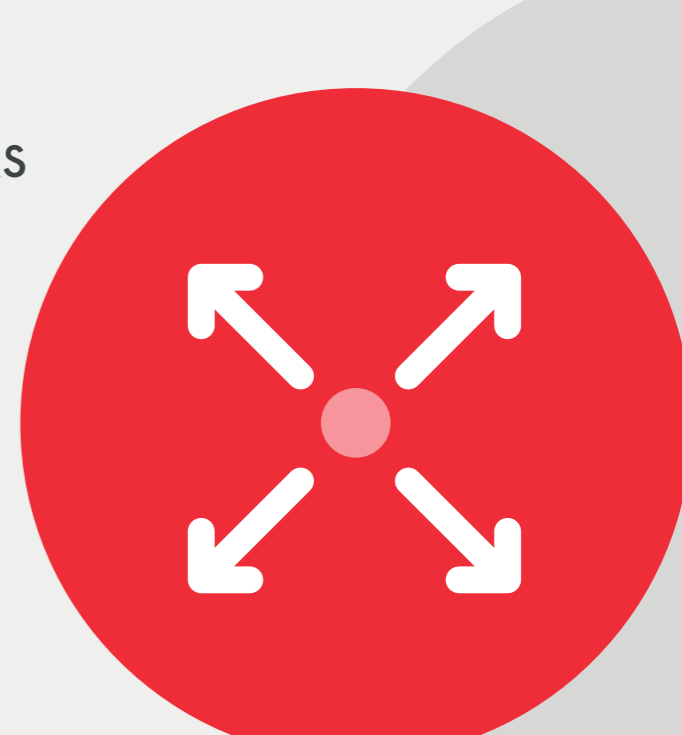

Seamless Integration with Leading 3rd Party Vendors.

- ✓ Proven integrations with leading ITSM / IPAM platforms (SNOW, Remedy, Infoblox and more)
- ✓ Rich set of external APIs to integrate with additional 3rd party platforms / solutions
- ✓ Out of the box integration with Leading vulnerability management platforms (Tenable, Qualys, Rapid7) to prioritize and mitigate vulnerabilities
- ✓ Graphical abstraction layer to easily integrate 3rd party products, without manually writing code
- ✓ Production ready customizations solution

Scalable, expandable distributed architecture to address large, complex environments.

- ✓ Proven to work in the world's largest enterprise networks
- ✓ Elastic distributed architecture with DS and RC - no additional license required
- ✓ Plug & Play license for network devices
- ✓ Topology support for large scale networks

Accurate Interactive Network Topology Map and Path Analysis Mechanism.

- ✓ Advanced Troubleshooting and What-if analysis for hybrid enterprise, including on-premise networks, SDN and public cloud
- ✓ Supporting the most common network technologies (NAT, MPLS, VPN, PBR, Dynamic routing and more)
- ✓ Real interactive path analysis tools, multi site connectivity analysis
- ✓ Expandable topology map, allowing customers to add unsupported network devices and configurations

About Tufin

Tufin (NYSE: TUFN) simplifies management of some of the largest, most complex networks in the world, consisting of thousands of firewall and network devices and emerging hybrid cloud infrastructures. Enterprises select the company's Tufin Orchestration Suite™ to increase agility in the face of ever-changing business demands while maintaining a robust security posture. The Suite reduces the attack surface and meets the need for greater visibility into secure and reliable application connectivity. With over 2000 customers since its inception, Tufin's network security automation enables enterprises to implement changes in minutes instead of days, while improving their security posture and business agility.
